Frameworks, commitments and guidance

10 Principles for integrated child protection systems (European Commission)

Principle 6 - Child protection systems ensure adequate care

“Standards, indicators and tools and systems of **monitoring and evaluation** are in place, under the auspices of a national coordinating framework. Systems are effectively regulated and independently monitored and accountable, ensuring accessible, quality, child-sensitive services and care for all children. The monitoring system guarantees unrestricted access to monitor the quality of services delivered, in particular for any form of institutional care.”

What needs to be monitored and evaluated?

| Situation, policies, reforms | System, services, individuals |
|--|---|
| Protection risks and needs of children and their families in the country | Child protection system performance and compliance with quality standards |
| Child protection policy implementation and outcomes for children | Individual-level / case management information |
| Child protection reforms and outcomes for children | Stakeholder views |

Core components
of an integrated
and participatory
CP ME system

Independent monitoring!
Digital solutions!
